**TURKANA COUNTY GOVERNMENT**  
**MINISTRY OF NATURAL RESOURCES AND CLIMATE CHANGE**  
**Office of the Director Climate Change**

**To:** To the SSHRC Grant Referee Panel,

I am writing to offer my full support for the proposed project on **Peacebuilding in Turkana County** in this grant application. As Director of the Turkana County Climate Change Directorate, I can confirm that the threat of conflicts caused by climate shocks is a pressing concern for our government, and we would be keen to implement the findings of this project to increase the effectiveness of peacebuilding activities in Turkana.

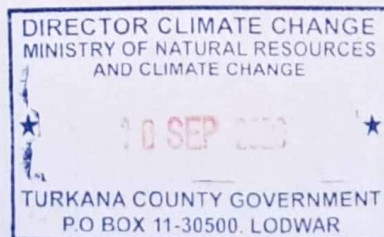

We have worked closely with members of this research team over the past few years. We have worked closely with Arthur Blouin at the University of Toronto and Julian Dyer at the University of Exeter in addressing climate change issue impacting Turkana County. The work conducted by this project team has contributed to the tools available to us in the Turkana County Government for collecting and distributing indigenous information and making use of traditional knowledge to enhance climate resilience. This team has also significantly supported the development of the County Climate Change Information System which is to support in optimising climate service delivery across the county.

We are keen to see this project funded and are excited about the next steps the teams have proposed. We are in full support of this application, which will provide us with actionable evidence to enable more effective peacebuilding in Turkana.

This team has experience working in Turkana and, from our previous work, I am confident that they will continue to work to empower local communities with respectful engagement. We have been collaborating successfully on the design of the Turkana County Climate Information System my Directorate is leading and research team members have been leading the Scientific Advisory Group to help us bring research insights into this initiative.

Sincerely,

**George Emase**

**Director Climate Change**

**Turkana County Government**
